

Our collective commitment is to ensure that EUROAPI delivers safe GMP & Regulatory compliant pharmaceutical products and services which meet our clients and patients' needs.

Our teams work passionately to develop, manufacture and supply premium products and services for our healthcare partners around the world. As a leader in our industry, we leverage our expertise and experience to meet the highest Quality standards. Although EUROAPI is a new company, we inherited solid GMP foundation, and we constantly improve our standards to reinforce our Premium Quality status and further develop this competitive advantage.

EUROAPI operates in accordance with applicable laws and regulations.

Quality Compliance is core to our fundamentals. In an environment of continuously increasing expectations, we commit to implement and maintain top notch quality systems and apply state-of-the-art regulations. We also take responsibility and participate in the evolution of this regulatory environment, with health regulators and other stakeholders, in the interest of our end patients.

Customer satisfaction is at the heart of our mission.

Our clients, whether they are startup or large companies, are seeking Suppliers and Contract Development Manufacturing Organizations (CDMOs) capable of providing integrated, safe, innovative, competitive, and sustainable industrial solutions; they entrust us with the development and / or production of increasingly complex molecules. For this purpose, we, all as individual and as a team, strive every day for acting with a permanent Customer Centricity Focus. Our Quality Management System and organization have been designed to achieve excellence beyond compliance and deliver clients with fully compliant products and services meeting their expectations in terms of quality, cost, and supply.

Our society is rapidly transforming, and active ingredient solutions have a central place in this transformation.

Our Quality Management System must enable innovation in all functions of the company. Among others, digitalization projects are embedded in our GMP processes.

Every employee is involved.

In the performance of all our operational activities, Quality starts with full engagement of our employees to respect standards, carefully designed, based on risk, and continuously revised to meet the latest regulations and practices. At EUROAPI, we continuously ensure to achieve this goal while keeping our organizational agility and entrepreneurial mindset.

Our quality culture is built on the science which is at the heart of our daily work; therefore, each of us is expected to take decisions based on facts and adopt a rational and compliant behavior in all circumstances. Everyone is accountable to always act with the company' and customers' interest in mind.

In EUROAPI, Quality is fully embedded in our DNA.
